

## Quick Reference Guide – Anesthesia

The Sunnybrook Incident Command Centre (ICC) is a platform designed for use in Mass Casualty Incidents and other major emergencies experienced by the hospital. The platform enhances the capabilities of the Hospital Emergency Operations Centre (HEOC) and multiple ancillary departments through Mass Notification, Patient Tracking and Family Reunification.

1. Authorized users can access the ICC using their windows account credentials at:

<http://icc/>

2. Active Incidents will appear on the main dashboard, users will select the desired incident which will load a department specific view

**Active Incident List** New Incident

DRILL - CODE ORANGE

multi vehicle collision Area: north # Patients: 30 Duration: 0d0h0m

3. The Anesthesia view includes the current incident status and 4 modules:
  - a. Incident Patients – displays a list of incident patients including CTAS score, injury, required downstream resources and current location/destination
  - b. Department Staff – Mass Notification activation status for all relevant department staff
  - c. Occupancy – Total hospital occupancy with patient level information for each unit
  - d. HEOC Requests – A list of departmental requests organized by type (Equipment/Staff/Supplies)

**Anesthesia** DRILL - CODE ORANGE STATUS: multi vehicle collision AREA: north # PATIENTS: 30 DURATION: 0d0h14m

Patients Department Staff HEOC Requests Occupancy

1 - RESUSCITATION 2 - EMERGENT 3 - URGENT 4 - LESS URGENT 5 - NON-URGENT 6 - EXPECTED/EXPIRED
